

What happened with the Internet in 2010?

How many websites were added? How many emails were sent? How many Internet users were there? This post will answer all of those questions and many, many more. If it's stats you want, you've come to the right place.

We used a wide variety of sources from around the Web to put this post together. You can find the full list of source references at the bottom of the post if you're interested. We here at Pingdom also did some additional calculations to get you even more numbers to chew on.

Prepare for a good kind of information overload. 🥹

#### Also check out our Internet 2012 in numbers article!

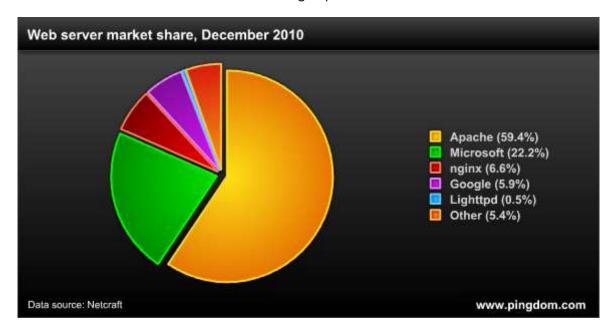

### Email

- 107 trillion The number of emails sent on the Internet in 2010.

- 3+ billion Photos uploaded per month to Facebook.
- 36 billion At the current rate, the number of photos uploaded to Facebook per year.

Data sources and notes: Spam percentage <u>from MessageLabs (PDF)</u>. Email user numbers and counts <u>from Radicati Group</u> (the number of sent emails was their prediction for 2010, so it's very much an estimate). Website numbers <u>from Netcraft</u>. Domain name stats <u>from Verisign</u> and <u>Webhosting.info</u>. Internet user numbers and distribution <u>from Internet World Stats</u>. Facebook stats <u>from Facebook</u> and <u>Business Insider</u>. Twitter stats <u>from Twitter (and here)</u>, <u>TwitterCounter</u> and <u>TechCrunch</u>. Web browser stats <u>from StatCounter</u>. YouTube video numbers <u>from Google</u>. Facebook video numbers <u>from GigaOM</u>. US online video stats <u>from Comscore and the Pew Research Center</u>. Flickr image numbers <u>from Flickr</u>. Facebook image numbers <u>from this blog</u>.
